
VintageView® Wine Racking & Storage

PUT YOUR WINE COLLECTION ON DISPLAY

VintageView® is an innovative range of wine racks that's great for simple wall mounted displays right up to fully fitted wine cellars.

With the VintageView® wine racking system, you can view your wine bottle labels instead of the corks, letting you clearly see the wines in your collection at a glance.

Already well proven in thousands of homes, restaurants, bars, hotels and wine shops; VintageView® wine racks will make your wine storage area a vibrant, artistic display.

VintageView® Wine Racking & Storage

The VintageView Wine Rack range comes in two colours, original green or platinum. With a choice of eight configurations, individual racks can hold from 9 to 36 bottles each. Racks of different size can be easily combined, providing endless possibilities for creating an impressive wine display to suit any installation.

The contemporary modular design makes them easy to install and maintain; the system's ability to combine different rack sizes into a single display means you can easily achieve higher bottle density than traditional racking systems.

TURN A WINE COLLECTION INTO AN IMPRESSIVE DISPLAY FEATURE

Whether in a small kitchen, a personal wine cellar, restaurant, bar or retail outlet, our racks allow you to create unusual and eye-catching designs for all sorts of wine collections. Where other racks can be overly complicated or obtrusive, the simplicity of this design means racks can be fitted easily and their flexibility allows for any combination of space to be utilised in the most effective way.

VintageView® Wine Racks
MAKING THE MOST OF YOUR WINE COLLECTION

VintageView® Wine Racking & Storage

VintageView® Wine Racks not only look great in any home but are perfect for restaurants, bars and hotels where imaginative and impressive designs can make a real feature out of any sized wine collection.

The basic six configurations give an exceptionally flexible and effective way to store wine bottles in nearly any space, regardless of height, depth or width limitations. It's the only wine storage solution that easily fits into narrow spaces, like hallways and under staircases, while still being able to expand to perfectly accommodate larger collections.

In addition to all the benefits of a label-forward wine storage system, VintageView® racks are also easy to install, provide perfect airflow between bottles and offer a safe way to store your wine collection.

VintageView® Wine Racks

MAKING THE MOST OF YOUR WINE COLLECTION

VintageView® Wine Racking & Storage

VintageView® racks are constructed from high grade steel to guarantee the safe storage of your wine collection, while still allowing you to create effective ways to show it off. The choice and flexibility of the range allow racks to be stacked or cut to fill any space, especially where traditional wine racks will not fit. That makes them ideal for use in any situation from domestic kitchens to commercial wine cellars.

A choice of 1, 2 or 3 deep racks allows you to store wine in places that other racks just can't go. From kitchen cabinets to tight corners and narrow spaces, our racks can offer the perfect solution.

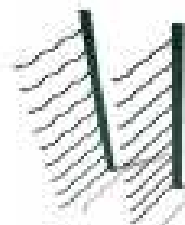

DON'T JUST STORE YOUR WINE - SHOW IT!

VintageView® Wine Racks have proven very popular in the States, especially in luxury residential settings, restaurants, bars and retail layouts where architects have been able to create unusual and eye-catching designs for all sorts of wine collections.

VintageView® Wine Racks Frequently Asked Questions

What are the racks made of ?

The racks are all made of high grade steel and come in two different finishes: Powder Coated to produce a Wine Bottle Green finish and Brushed Nickel to produce a Platinum finish.

Can I store as many bottles with VintageView® wine racks as with traditional racks?

For a straightforward installation, our 3-bottle deep racks will generally hold the same quantity of bottles as standard cork-forward racks...9 bottles per square foot. However, where you have different or unusual spaces, the options within our range allow you to fit even more bottles than with a traditional rack, for example into tight corners. Apart from utilising the 1 or 2 deep racks for narrower spaces, you can also interlace our 3-bottle racks (call for details) and increase your storage capacity to as much as 11 bottles per square foot.

Is installation difficult with the VintageView® wine rack?

Our racks are simple to install using a standard level, a wine bottle and a screwdriver (you may also need a drill with some mounting surfaces). All racks come with detailed installation instructions. VintageView® racks can be installed onto wood, brick, plasterboard, drywall or just about any other surface. There are six pre-drilled mounting holes for fasteners on each set of racks, three holes per side. Due to the variety of possible applications fasteners are not included with your racks, though we recommend #8 x 50mm screws for most surfaces and if needed a suitable fixing (e.g. wall plugs or spiral hollow fixing).

What are the general installation guidelines?

Standard bottles [750ml] average 30 cm in length. For this size bottle the VintageView® racks are mounted at 19 cm apart per upright (starting a minimum of 7 cm distance from your first perpendicular wall) and then 14 cm between sets of racks. Therefore each rack requires approximately 33 cm of space, side-to-side, for installation with standard bottles.
