

How to use: Traditional Wine Rack Metal Connector Kit

- 1 – Position & screw Rack #1 to the wall
- 2 – Position Rack #2 approximately 95mm from Rack #1 (metal to metal / side by side)
- 3 – Tap in several of the connectors into the front of the rack to join them together
- 4 – Adjust Rack #2 so all of the positioned connectors are tight
- 5 – Screw Rack #2 to the wall
- 6 – Tap in the remaining connectors until the rack is complete
- 7 – Continue this process if joining additional racks
